FOIL

WORKSHOP

PLAY

The most important thing about Workshop is to play and have fun. There are no set rules. We want you to enjoy yourself.

LEARN

Learning and Educating is key to really explaining what Foilco do and what foil is about. By understanding this you can really start to use foil in the best possible way.

CREATE

You can't come to one of our Workshops without actually creating something. You will create the weird and wonderful and all using foil.

THINK

Thinking is what leads to creativity. We'll ask how best can you use foil in the future and how can foil help in your design and creative work. We aim to get you thinking.

FOIL

Finally foil. Put simply it's what it's all about. We work with it all the time, so we are here to help you work with it and love it like we do.

What is Workshop?

Workshop is a travelling...Workshop! Created to showcase different foiling techniques and processes associated with it. The Workshop aims to educate and inspire students, printers, bedroom entrepreneurs and anybody else who might be interested in all things foil!

The workshop will allow you the chance to get hands on with hot stamping foils, use traditional printing equipment (hot stamping) and innovative equivalents (digital toner foiling).

It's an opportunity for you guys as the designers or printers of tomorrow, to inspire us in the different creative ways that you can use foil in graphic design and manufacturing.

We have the playground and we want you to have fun in it.

What will happen at Workshop?

Well, firstly you'll get to learn about foil. We're talking decorative foils used in print. Whether that's in packaging, book making, in fashion or just as a piece of beautiful design work. Foil is everywhere, you just may not have realised it yet!

Foilco are one of Europe's leading suppliers of hot stamping foil, speciality lamination films and supporting print production materials. We support you with technical advice, advise on best practice and are always looking to innovation in and around our print sector.

We pride ourselves on having the largest range of colours and effects in the industry, with hundreds of different finishes, patterns, pigment and Pantone colours, metallic and holographic foils.

We'll talk about the benefits of using stamping foil, our environmental policy and industry leading approach and how to best to specify foil.

Like the idea of Workshop?

We hope you do! If you are a University, Design Agency or Printer and want to know more, please get in touch with us and we can discuss the best way of making this happen.
